Northstar Studio Remote Work Handbook

Version 1.2, revised March 2025.

This handbook explains how the small product team works across time zones.

The core collaboration window is 1:00 PM to 4:00 PM UTC on weekdays.

Outside that window, teammates should leave clear written handoffs.

Use the project tracker for decisions that affect delivery dates.

Meeting and communication guidelines

Weekly planning happens every Monday at 2:00 PM UTC and lasts 45 minutes.

A meeting needs an agenda before it is scheduled.

Use chat for quick questions and the project tracker for durable decisions.

The expected response time for non-urgent chat is one business day.

Urgent production issues should be marked with the incident label.

Time off and equipment

Request planned time off at least ten calendar days before the first day away.

For unexpected sick leave, notify your manager as soon as practical.

The company reimburses up to 600 US dollars for a home-office setup after approval.

Receipts must be submitted within 30 days of purchase.

Company laptops are replaced on a four-year cycle unless repair is impractical.
